

how to make a slideshow with markdown and  
pandoc/beamer

# setup

- go to `/home/scripts/pandoc/markdown`
- then open up a `.md` file in your fav text editor

i'll just show ex of how to set up metadata:

[three dashes]

title:

- how to make slideshows

author:

- me

theme:

- Copenhagen

[three dashes]

- first off, one hashtag for a heading/ new slide
- two hashtags for a subsection
- use + to create an entry in a list

## to change text format:

- 2 asteriks **bold** 2 asteriks
- asteric *italic* asteric
- tilde ~~strikethrough~~ tilde

add some pics

[exclamation mark][pic caption] file.png

finally, let's compile and open this bad boy

compile

```
pandoc sourcefile.md -t beamer -o outputfile.pdf
```

open

```
mupdf outputfile.pdf
```
